

PAINT BOOTH LIGHT FIXTURES

Built and assembled at the Global Finishing Solutions® (GFS) headquarters in Osseo, Wisconsin, GFS light fixtures provide a cost-effective and energy-efficient solution for your paint booth lighting needs. All GFS paint booths come complete with four or six-tube, inside-access light fixtures to create an exceptionally bright spraying environment with minimal shadows. GFS also offers a full line of replacement bulbs.

T5 LIGHT FIXTURES

An upgrade option on most GFS paint booths and finishing equipment, T5 light fixtures are recommended for tall booths or booths located in areas that reach high temperatures. GFS T5 light fixtures and lamps offer excellent performance and efficiency.
