

SERVICE & Preventative Maintenance

GFS' Service & Preventative Maintenance programs take the hassle out of maintaining your paint booth and ensure it continues to operate in peak condition for years to come. We offer a variety of programs – which may include quarterly and annual site visits, filter and part replacement, booth cleaning and just-in-time filter replenishment – or can customize a plan to fit your business' needs.

REDUCE DOWNTIME AND PROLONG BOOTH LIFESPAN

GFS Service & Preventative Maintenance programs help ensure your paint booth is running properly, reducing costly downtime and prolonging its lifespan. Booth inspections help identify potential issues before they become bigger, costlier ones.

EMPLOYEE AND EQUIPMENT SAFETY

Improper booth care and cleaning can lead to parts wearing down or falling apart, creating a potentially dangerous situation for your employees. GFS technicians will inspect all booth components to ensure a safe working environment.

BETTER-QUALITY FINISHES

A clean booth with optimal airflow allows for better-quality paint finishes. In addition to inspecting the performance of the booth, GFS technicians will deep clean the booth annually. This includes the application of Booth Shield® – a peelable protective booth coating – for a clean, bright painting environment.

EXPERIENCED, CERTIFIED TECHNICIANS

Our certified technicians are experienced at identifying and correcting potential booth issues. In addition to working with GFS booths, our technicians have performed service and maintenance on more than 20 brands of paint booths.

DEDICATED DEPARTMENT

Our dedicated team of representatives is available – via a direct phone number and email address – to assist you with scheduling site visits, filter or part replacement, or emergency service.

EXCELLENT SERVICE AND SUPPORT

We continually strive to provide outstanding customer service. You can count on GFS' Service & Preventative Maintenance team for record response times, personalized service and knowledgeable representatives.
